Not a few of the titles here are not about American Indian law as such, but might be considered indispensable (i.e., provide important historical, sociological, anthropological, political, or other forms of knowledge) for understanding endogenous and exogenous variables viewed through emic and etic perspectives that directly or indirectly influence this or that aspect of Indian law. I welcome suggestions for additional titles. Some excellent blogs and internet sites are appended to this compilation. (Thanks to Professor Matthew L.M. Fletcher for some title suggestions.)
