New Mexico Tribal Liaison
South Central Climate Adaptation Science Center

Position Description
This position manages relationships between the South Central Climate Adaptation Science Center (CASC) and its Tribal partners in New Mexico. The liaison will be responsible for working closely with partners from a variety of Tribes, Pueblos, and inter-tribal organizations in New Mexico to develop and deliver trainings on climate adaptation and related topics, provide support to communities seeking or engaged in adaptation activities, and work to identify and reduce barriers to implementing Tribal adaptation activities. When requested by our partners, the liaison will lead research and education activities that are designed to increase knowledge of climate and its impacts, identify outside resources to help with specific projects, and promote opportunities for collaboration through research partnerships. The liaison will coordinate with our CASC Sustainability Scientist on regional efforts working with Indigenous communities. The liaison will work with the South Central CASC to identify ways that researchers and other professionals can design research, data products, and tools to better fit the needs of Tribal partners, and will work to deliver these products for use in climate adaptation planning. Extensive travel in New Mexico to meet with partners is expected.

The selected candidate will join a diverse, interdisciplinary team dedicated to supporting the use of climate information in adaptation planning. The Tribal liaison will be an employee of the University of Oklahoma and based out of the University of New Mexico in Albuquerque.

Required Qualifications
- Bachelor’s degree in Geography, Environmental Sustainability, Native American Studies, Regional Planning, or related fields (by January 1, 2019); exceptional applicants from other disciplines will be considered.
- 18 months experience developing relationships of trust in Indian Country.
- Well-developed organizational, communications (written and oral), human relations, and technical skills.
- Demonstrated ability to be highly organized, handle multiple projects, complete work within deadlines, and create and deliver effective presentations.
- Demonstrated cultural competence and ethics working with Indigenous peoples and communities.
• Demonstrated understanding of sovereignty, Tribal governance, traditional knowledge, different cultures, and place-based or culturally based decision making.
• Demonstrated ability to work with an interdisciplinary team.
• Applicants should be motivated, have the ability to complete projects with minimal supervision, and be able to both serve and lead collegially as a team player.
• Proficiency with computer applications, including Powerpoint, Word, and Excel (or Mac OSX equivalents).
• Must have basic knowledge of accounting principles.
• Must have a valid driver’s license and be able to pass a background check.

Preferred Qualifications
• Additional education or experience, especially as related to vulnerability assessment, climate adaptation planning, small-group facilitation, or climate science.
• Master’s degree in Geography, Environmental Sustainability, Native American Studies, Regional Planning, or related fields.
• Project management experience.
• Proposal writing experience.

Salary range: $39,615 to $45,000, depending on education and work experience. Early-career candidates are encourage to apply. The University of Oklahoma is an equal opportunity institution:  www.ou.edu/eoo.
