U.S. DISTRICT COURT
EASTERN DISTRICT OF WASHINGTON

Aug 01, 2022

SEAN F. McAVOY, CLERK

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WASHINGTON

CONFEDERATED TRIBES AND
BANDS OF THE YAKAMA NATION,
Plaintiff,
v.
CITY OF YAKIMA, a municipal
corporation,
Defendant.

No. 1:20-CV-03156-SAB

**ORDER DENYING MOTIONS
FOR SUMMARY JUDGMENT**

Before the Court are Plaintiff Confederated Tribes and Bands of the Yakama Nation’s Motion for Summary Judgment on Liability (ECF No. 69), and Defendant City of Yakima’s Motion for Summary Judgment (ECF No. 71). The motions were considered without oral argument. Plaintiff Confederated Tribes and Bands of the Yakama Nation (the “Yakama Nation”) is represented by Anthony Aronica, David Askman, Michael Frandina, Thomas Zeilman, and Shona Voelckers. Defendant City of Yakima (the “City”) is represented by Kurt Peterson, Spencer Gheen, and Aaron Gilligan.

Having reviewed the parties’ briefing and pertinent caselaw, the Court finds that although the Yakama Nation’s oversight activities constitute “removal” actions under the Comprehensive Environmental Response, Compensation, and Liability Act, disputes of material fact preclude a finding on whether the Yakama

1 Nation's costs are compliant with the National Contingency Plan. Therefore, both
2 motions for summary judgment are denied.

3 **Facts¹**

4 This case is about recovery of costs for oversight of environmental
5 remediation at a former municipal landfill site in Yakima, Washington. In 1963,
6 the City entered into a lease with Boise Cascade Corporation to operate a
7 municipal solid waste landfill on land owned by Boise Cascade Corporation, which
8 was at the time primarily used as a lumber mill. The City operated the landfill on
9 this land, referred to herein as the Landfill Site, from 1963 to 1970.

10 The municipal landfill was unlined and covered twenty-eight acres directly
11 adjacent to the Yakima River. There have been releases or threatened releases of
12 hazardous substances at the Landfill Site to both soil and groundwater, including
13 diesel range organics; heavy oils; vinyl chloride; n-nitrosodiphenylamine; 4,4'-
14 DDT; 4,4'-DDD; endosulfan II; bis(2-ethylhexyl) phthalate; 3,3'-
15 dichlorobenzidine; arsenic; iron; manganese; nitrate; PCB aroclors; sodium and
16 methane gas; and potentially lead and chromium. The Landfill Site is estimated to
17 be within 500 feet of the Yakima River, and groundwater flows from the Landfill
18 Site toward the river.

19 On or about January 11, 1996, the City notified the Washington Department
20 of Ecology ("Ecology") of the inadvertent discovery of hazardous contaminants
21 during the construction of the I-82 highway Exit 33A offramp. That same year, the
22 Landfill Site was designated as a cleanup site by Ecology. From 1997 to 2015, the
23 City, in coordination with Ecology, conducted soil and groundwater investigations
24 to identify releases or potential releases at and from the landfill site. In 2015,

25
26 ¹ The following facts derive from the parties' respective statements of fact,
27 submitted pursuant to Federal Rule of Civil Procedure 56(c) and Local Civil Rule
28 56(c)(1). *See* ECF Nos. 70, 71, 76, 78, 82, 84.

1 Ecology approved the City’s final addition to the Remedial Investigation Report
2 and the City is set to undertake a Feasibility Study.

3 On March 30, 2017, the City was identified as a potentially liable person
4 (“PLP”) for releases of hazardous substance at the Landfill Site pursuant to the
5 Washington Model Toxics Control Act (“MTCA”). The Yakama Nation began
6 reviewing site documents in March 2017. Ecology issued a formal determination
7 that the City is a PLP for the Landfill Site in a letter dated May 5, 2017. Pursuant
8 to MTCA, Ecology executed Agreed Order number 15861 with the City on July 9,
9 2018 to conduct removal and/or remedial action for the hazardous releases at the
10 Landfill Site.

11 The Yakama Nation is a federally recognized Indian tribe. The Landfill Site
12 is the location of a historic Yakama village, located approximately two or three
13 miles from the Yakama Nation reservation. As noted, the Landfill Site is adjacent
14 to the Yakima River, which is a usual and accustomed fishing place of the Yakama
15 Nation under Article III of the Treaty with the Yakamas of June 9, 1855. 12 Stat.
16 951. The riparian area is culturally significant to the Yakama Nation and serves as
17 critical habitat for certain endangered species. The Yakama Nation became
18 involved in the Landfill Site to assess actual or threatened releases to the Yakima
19 River, or other impacts to its tribal interests, from hazardous substances at the
20 Landfill Site.

21 At issue in this case is the Yakama Nation’s purported response costs. The
22 Yakama Nation has performed a review of analyses completed by the City and
23 overseen by Ecology, but has not engaged in independent data collection. Its
24 response costs include time for meetings, telephone calls, and electronic mail
25 among representations of Ecology, the City, and the Yakama Nation’s Fisheries
26 Program, as well as written correspondence and comments by Fisheries staff to
27 Ecology on the Agreed Order and Interim Action Plan. Since the Yakama Nation’s
28 involvement at the Landfill Site, two cultural resource surveys were conducted.

1 On or about June 17, 2020, in order to construct new roads as part of a
2 proposed “East-West Corridor” project, the City entered into a purchase and sale
3 agreement for land located within the Landfill Site. The City currently owns in fee
4 simple land located within the Landfill Site.

5 **Summary Judgment Standard**

6 Summary judgment is appropriate “if the movant shows that there is no
7 genuine dispute as to any material fact and the movant is entitled to judgment as a
8 matter of law.” Fed. R. Civ. P. 56(a). There is no genuine issue for trial unless
9 there is sufficient evidence favoring the non-moving party for a jury to return a
10 verdict in that party’s favor. *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 250
11 (1986). The moving party has the initial burden of showing the absence of a
12 genuine issue of fact for trial. *Celotex Corp. v. Catrett*, 477 U.S. 317, 325 (1986).
13 If the moving party meets its initial burden, the non-moving party must go beyond
14 the pleadings and “set forth specific facts showing that there is a genuine issue for
15 trial.” *Anderson*, 477 U.S. at 248.

16 In addition to showing there are no questions of material fact, the moving
17 party must also show it is entitled to judgment as a matter of law. *Smith v. Univ. of*
18 *Wash. Law Sch.*, 233 F.3d 1188, 1193 (9th Cir. 2000). The moving party is entitled
19 to judgment as a matter of law when the non-moving party fails to make a
20 sufficient showing on an essential element of a claim on which the non-moving
21 party has the burden of proof. *Celotex*, 477 U.S. at 323. The non-moving party
22 cannot rely on conclusory allegations alone to create an issue of material fact.
23 *Hansen v. United States*, 7 F.3d 137, 138 (9th Cir. 1993). When considering a
24 motion for summary judgment, a court may neither weigh the evidence nor assess
25 credibility; instead, “the evidence of the non-movant is to be believed, and all
26 justifiable inferences are to be drawn in his favor.” *Anderson*, 477 U.S. at 255.

27 Where, as here, parties submit cross-motions for summary judgment, “[e]ach
28 motion must be considered on its own merits.” *Fair Hous. Council of Riverside*

1 *Cty., Inc. v. Riverside Two*, 249 F.3d 1132, 1136 (9th Cir. 2001). Accordingly, it is
2 the district court’s duty to “review each cross-motion separately . . . and review the
3 evidence submitted in support of each cross-motion.” *Id.*

4 **Discussion**

5 The parties have submitted cross-motions for summary judgment. The
6 Yakama Nation moves for summary judgment on the City’s liability for response
7 costs it has incurred from March 2017 through September 30, 2021 (\$133,671.70)
8 and future costs. It asserts that the City is liable as an “owner” of the landfill
9 “facility” to which there have been releases or threatened releases of hazardous
10 substances, and therefore, it is a liable party under the Comprehensive
11 Environmental Response, Compensation, and Liability Act of 1980 (“CERCLA”),
12 42 U.S.C. § 103 *et seq.* The Yakama Nation argues that its activities constitute
13 “removal” actions because they were necessary to “monitor, assess and evaluate
14 the conditions at the Site”; it also argues its response costs are sufficiently
15 documented. ECF No. 69 at 15–16.

16 Conversely, the City moves the Court for summary judgment on all claims
17 against it, arguing that the Yakama Nation cannot prove the essential elements of a
18 CERCLA claim. Specifically, it claims the Yakama Nation’s activities do not
19 constitute “removal” actions under CERCLA. In any case, the City also contends
20 that the Yakama Nation’s costs are not recoverable because they do not comply
21 with the National Contingency Plan; it argues the purported costs are
22 “unsubstantiated, do not relate to the Landfill Site, and cannot be properly
23 differentiated without guesswork.” ECF No. 71 at 3.

24 To prevail in a private cost recovery action under CERCLA, a plaintiff must
25 establish four elements: (1) the site on which the hazardous substances are
26 contained is a “facility,” 42 U.S.C. § 9601(9); (2) a “release” or “threatened
27 release” of any “hazardous substance” from the facility has occurred, *id.*
28 § 9607(a)(4); (3) such “release” or “threatened release” has caused the plaintiff to

1 incur response costs for “removal” or “remediation” action that were “necessary”
2 and “consistent with the national contingency plan,” *id.* § 9607(a)(4)(A); and (4)
3 the defendant is within one of four classes of persons subject liability, *id.*
4 § 9607(a)(1)–(4); *see generally Carson Harbor Vill., Ltd. v. Unocal Corp.*, 270
5 F.3d 863, 871 (9th Cir. 2001) (quoting *3550 Stevens Creek Assocs. v. Barclays*
6 *Bank*, 915 F.2d 1355, 1357 (9th Cir.1990)).

7 The parties do not dispute that the Landfill Site is a “facility” to which a
8 “release” or “threatened release” of a hazardous substance has occurred. They also
9 do not dispute that the City is a liable party under the statute, as the City is a
10 current owner of the Landfill Site. Rather, the parties’ motions present two legal
11 issues pertaining to the third element of a CERCLA claim: that is, whether the
12 Yakama Nation has (1) incurred response costs for a “removal” or “remedial”
13 action (2) that was “necessary” and “consistent with the national contingency
14 plan.” 42 U.S.C. §§ 9607(a)(4), (a)(4)(B).

15 A. Whether the Yakama Nation’s activities constitute “removal” actions
16 under CERCLA.

17 The first issue is whether the Yakama Nation’s monitoring and oversight
18 activities constitute removal or remedial actions. The Yakama Nation argues only
19 that its activities were “removal” actions, as defined by 42 U.S.C. § 9601(23). The
20 parties agree that the Court may look to the record to determine whether the
21 Yakama Nation’s activities constitute “removal” actions; on this issue, the parties
22 do not dispute the kinds of activities the Yakama Nation engaged in, and there is
23 no dispute of material fact that would preclude summary judgment on the matter.

24 “Removal” means:

25 [T]he cleanup or removal of released hazardous substances from the
26 environment, such actions as may be necessary taken in the event of the
27 threat of release of hazardous substances into the environment, such actions
28 as may be necessary to monitor, assess, and evaluate the release or threat of
release of hazardous substances, the disposal of removed material, or the

1 taking of such other actions as may be necessary to prevent, minimize, or
2 mitigate damage to the public health or welfare or to the environment, which
3 may otherwise result from a release or threat of release. . . .

4 *Id.* “Cleanup-adjacent activities face a low bar to satisfying these definitions of
5 ‘removal,’” as the statute “covers all activities ‘as may be necessary’ to advance
6 certain threat assessment or abatement goals.” *Pakootas v. Teck Cominco Metals,*
7 *Ltd.*, 905 F.3d 565, 579 (9th Cir. 2018) (citing *United States v. W.R. Grace & Co.*,
8 429 F.3d 1224, 1238 (9th Cir. 2005)). The Ninth Circuit in *Pakootas* reasoned that
9 the permissive language of “as may be necessary” means “qualifying activities
10 need not be performed with the *intent* of achieving the statutory goals; need not be
11 absolutely *necessary* to achieve those goals; and need not *actually* achieve those
12 goals.” *Id.* (emphasis in original). Rather, if the activities “are not an unreasonable
13 means” of furthering the cleanup or removal of hazardous substances, they fall
14 within the definition of “removal.” *Id.* (citing *Cellco P’ship v. FCC*, 357 F.3d 88,
15 91 (D.C. Cir. 2004)).

16 The removal activities set forth by the Yakama Nation primarily involve
17 communicating with Ecology to provide technical review and input on the
18 investigation of contamination and cleanup actions at the Site. The Yakama Nation
19 did not conduct any independent investigation related to the release or threat of
20 release of hazardous substances, such as the collection of sediment or water
21 samples. Instead, the Yakama Nation’s involvement is summarized as “review[ing]
22 documentation and prepar[ing] comments from a cleanup perspective.” ECF No.
23 76-2 at 5. Such comments consisted of inquiries to Ecology and the City regarding
24 concerns with selected sampling and monitoring methods, and findings. *See, e.g.*,
25 ECF No. 76-2, ECF No. 73-7. The issue thus becomes whether these actions were
26 an unreasonable means of furthering the cleanup and removal of hazardous
27 substances at the Site. *Pakootas*, 905 F.3d at 579.

1 The Yakama Nation’s monitoring and oversight activities constitute removal
2 actions. Its collaborative oversight of remedial actions at the Landfill Site, such as
3 reviewing and commenting on proposed actions, participating in a technical
4 assistance group, evaluating study results, and engaging in discussions concerning
5 the City’s removal of contaminated sediment, are activities that “may be necessary
6 taken in the event of the threat of release of hazardous substances into the
7 environment” and “may be necessary to monitor, assess, and evaluate the release
8 or threat of release of hazardous substances” pursuant to CERCLA. 42 U.S.C.
9 § 9601(23).

10 The Court need not determine whether the actions were “absolutely
11 necessary” to achieve the statutory goals of CERCLA; rather, it need only decide
12 whether these oversight activities were an “unreasonable means” of furthering the
13 assessment and cleanup of hazardous substances. *Pakootas*, 905 F.3d at 579. The
14 Court finds these activities were not unreasonable because they “advance[d]
15 certain threat assessment and abatement goals” at the Landfill Site. *Id.* Therefore,
16 the Yakama Nation’s oversight activities fall under the statutory definition of
17 “removal.”

18 B. Whether the Yakama Nation’s response costs are consistent with the
19 National Contingency Plan.

20 The second issue is whether the Yakama Nation’s response costs are
21 consistent with the National Contingency Plan (“NCP”). The primary limitation on
22 the Yakama Nation’s ability to recover its response costs is the requirement that
23 those actions not be inconsistent with the NCP. 42 U.S.C. § 9607(a)(4)(A). When
24 an Indian tribe seeks recovery of its response costs, consistency with the NCP is
25 presumed. *Washington State Dep’t of Transp. v. Washington Nat. Gas Co.*,
26 *Pacificorp*, 59 F.3d 793, 799–800 (9th Cir. 1995). To rebut this presumption, the
27 defendant must prove the response action was arbitrary and capricious. *See id.* at
28 802; 42 U.S.C. § 9613(j)(2). While the City asks that the Court use a less

1 deferential standard of review “such as reasonableness review,” it does not cite any
2 case or statute supporting the availability of an alternative standard of review. ECF
3 No. 71 at 11. As the Yakama Nation is an Indian tribe seeking response costs, the
4 correct standard is whether the costs were arbitrary and capricious or otherwise
5 unlawful. *Fireman’s Fund Ins. Co. v. City of Lodi*, 302 F.3d 928, 949 (9th Cir.
6 2002) (citing *Washington State Dep’t of Transp.*, 59 F.3d at 799).

7 At this stage of the proceedings, summary judgment on cost consistency is
8 precluded because the facts on record are disputed and, at best, inconclusive on
9 material issues. Summary judgment is only appropriate where there is no dispute of
10 genuine fact. Fed. R. Civ. P. 56(a). The parties disagree on whether there are one
11 or two CERCLA facilities, which affects assessment of the Yakama Nation’s cost
12 reports; yet, there is insufficient factual development on that legal issue. Moreover,
13 a significant portion of the Yakama Nation’s cost documentation is redacted and
14 prevents meaningful review on summary judgment. It is not possible for the Court
15 to discern the relatedness, or the reasonableness, of the purported costs absent
16 additional evidence.

17 To illustrate, the City contends that some of the Yakama Nation’s claimed
18 costs relate to a separate contaminated site, known as the Mill Site, or the East-
19 West Corridor project. Whether some costs pertain to a separate CERCLA site, or
20 the East-West Corridor project, is material to determining whether all or some of
21 the Yakama Nation’s costs for monitoring the Landfill Site are consistent with the
22 NCP. Costs for an unrelated site to which the City does not share liability are not
23 recoverable, and neither are costs related to the East-West Corridor project. The
24 present record does not provide adequate factual briefing for the Court to
25 determine whether the Mill Site is part of the same CERCLA “facility” as the
26 Landfill Site, or whether the City may be a liable party for the Mill Site.

27 The City also argues that the Yakama Nation’s legal billing record is
28 inadequate, as most of the information is redacted. In support of its motion, the

1 Yakama Nation has provided a response cost documentation report for fiscal years
2 2018 to 2021. ECF Nos. 70-1, 70-3. The report includes personnel time sheets,
3 travel advances, contractual invoices, and legal support services. The City points
4 out a large portion of the legal support services invoices are completely redacted,
5 totaling nearly \$64,000 of billed hours. ECF No. 70-1 at 91–129. The Court agrees
6 that the legal billing record is unhelpful as submitted—yet, it comprises a
7 substantial portion of the Yakama Nation’s costs.

8 The present record does not sufficiently account for legal costs expended at
9 the Landfill Site, and it does not allow the Court to resolve necessary factual and
10 legal issues. The Court cannot conclude that the Yakama Nation’s costs are wholly
11 inconsistent with the NCP, a finding requested by the City in its motion, but it also
12 cannot conclude that the same costs are consistent because the record does not
13 address all essential facts. For these reasons, neither party is entitled to judgment as
14 a matter of law on the issue.

15 Accordingly, **IT IS HEREBY ORDERED:**

16 1. Plaintiff’s Motion for Summary Judgment on Liability (ECF No. 69)
17 is **DENIED**.

18 2. Defendant’s Motion for Summary Judgment (ECF No. 71) is
19 **DENIED**.

20 **IT IS SO ORDERED.** The District Court Executive is hereby directed to
21 file this Order and provide copies to counsel.

22 **DATED** this 1st day of August 2022.
